

Software Developer

Rockside is looking for an experienced Software Developer to join our team in Paris. You will help us to create polished and innovative features for our products.

About Rockside

We love design systems that are elegant abstractions over complex Blockchain technologies. Rockside is an On premises and Cloud **Blockchain service provider** that helps developer teams build apps, industrialize processes and scale their projects. Rockside brings all services in one place to solve Blockchain challenges (Run node, launch consortium, monitor infrastructure, bringing top notch security and reliability...) Our current technical stack is Go / Vue / Laravel - GCP/AWS & K8S. All our technical documentation is public <https://github.com/blockchain-studio/rockside>

The opportunity

You will be working in a small team (12 people, 8 experienced developers). Your role will consist in collaborating with other software engineers to:

- Develop and document new features in Rockside.
- Build a new API for our users and improve existing APIs
- Integrate tools to work with the evolving Blockchain ecosystem (such as Pantheon, Web3, Parity, Geth, Hashicorp Vault and other tools...)
- Fix issues reported by customers via GitHub
- Write technical documentation and blog posts
- Attend conferences to hone your tech skills, meet customers, and represent Rockside!

Your background

- Working in multiple technologies and programming languages
- A minimum of 3 years experience as a software developer
- Familiarity with agile software development methodologies.
- Knowledge of web frameworks / REST design principles

Ideally

- Strong written and verbal communication skills
- An orientation towards product development
- Expertise in GCP (k8s) or AWS or Azure.
- Experience working with distributed software
- Experience with Kubernetes or other container orchestration systems
